

Increase  
live weight gains with  
**Vistacell** live yeast

## What is Vistacell?

Vistacell is a live yeast product that improves performance and feed efficiency when fed to beef cattle. Developed specifically to maximise rumen efficiency and boost animal performance, with Vistacell you can **boost growth rate by up to 10%**

### Benefits of feeding Vistacell:

- Increase growth rate up to 10%
  - Up to 10% increase in feed conversion efficiency
  - Reduced risk of acidosis
  - Improved dung consistency
- >2:1 return on investment

### Vistacell works by:

- Supplying more live yeast cells than other yeast products
- Removing oxygen, to improve the rumen environment
- Increasing fibre digesting bacteria, to improve feed digestibility and rumen efficiency
- Increasing lactic acid utilising bacteria

## Feed rate

**In feed** - 2g / head /day

**Vistacell 4% on farm pack** - 50g / head / day

**Vistacell 8% on farm pack** - 25g / head/ day
