

Vistacell

DAIRY

- Improves feed efficiency
- Increases milk yield by up to 2L/cow/day
- Improves fibre digestion

Vistacell delivers a high number of live yeast cells on a daily basis, improving conditions within the rumen to boost the profitability of your herd.

Dried in a granular form with an outer shell, Vistacell is designed to deliver a high level of protection to the inner core of live yeast cells. This improves stability and ensures a high level of activity within the rumen for a longer time.

How does Vistacell work?

Vistacell acts as a probiotic to improve rumen and gut health by boosting the growth of beneficial rumen bacteria and improving rumen fermentation. By removing oxygen and competing for sugars in the rumen, Vistacell improves the environment for fibre digesting and lactate utilising microbes, allowing them to thrive and grow.

The result is an increase in microbial protein production, an optimised rumen pH and improved fibre digestion. All factors which are essential in maximising the efficiency of high performing dairy cows.

Mode of action of live yeast

Features

- Oxygen scavenging
- Competes with bacteria for sugars
- Production of metabolites
- Altered rumen flora and fermentation

Optimised rumen productivity and efficiency

Benefits

- Increased fibre digestion
- Increase & stabilisation of rumen pH
- Increased microbial protein synthesis

Using Vistacell can represent a 7:1 return on investment*

*Based on 25p per litre of milk

On Farm benefits

- ↑ Increased milk yield and butterfat
- ↑ Improved body condition
- ↑ Improved feed efficiency
- ↓ Reduced incidence of acidosis and SARA
- ↑ Improved dung consistency

Andrew Reid's 200 cow herd in County Antrim, Northern Ireland averages 10,000 litres with 4.11% butterfat.

"The only way to keep yields this high and maintain butterfats is to make sure the rumen is working as near perfectly as possible for as much of the time as possible. From our experience, Vistacell is absolutely essential to achieving that - at this level of production you simply can't cut corners."

FarmPacks

Vistacell FarmPack is available as a single product solution or in combination to help improve rumen performance, depending on the challenge.

	Live Yeast	Acid Buf	Ultrasorb	Bag Size	g/head/day
Vistacell 4%	✓			20kg	100
Vistacell 8%	✓			20kg	50
Vistacell AB 4%	✓	✓		15kg	100
Vistacell AB 8%	✓	✓		15kg	50
Vistacell Ultra	✓		✓	20kg	50
Vistacell AU	✓	✓	✓	15kg	100

Commercial feed inclusion: 4g/head/day
